# REFERENCE GUIDE
Logitech BRIO

Logitech® delivers our best webcam ever with 4K UHD and 5X zoom for amazing video quality. BRIO is packed with advanced features, like Logitech's RightLight™ 3 with HDR, which makes you look great in any illumination, from low light to direct sunlight. BRIO supports infrared-based facial recognition to strengthen login security, and offers multiple FOV options – 65°, 78°, and 90°.

Removable clip

REFERENCE GUIDE
Logitech BRIO

1 MOUNT

Attach camera to clip to mount on your screen, or mount camera directly onto tripod.

Screen   Tripod

2 CONNECT

Connect cable to the camera and a computer. It may take a few seconds for your computer to recognize BRIO as a new camera.

Note: USB 3.0 recommended for Windows Hello, and required for 4K.

USB 2.0
USB 3.0

3 GO

Start your video or audio call from your application. The LED on the camera will light when streaming.

WINDOWS HELLO

Your camera is certified for Windows® Hello™ to use facial recognition login for Windows 10.

Note: The camera will also work with other facial recognition software for both Windows and Mac®. Please visit our support website for more details.

Note: IR is more reliably supported with USB 3.0.

CAMERA SETTINGS APP

Download the Camera Settings app to choose the field of view, adjust image settings, and pan, tilt, and zoom into the perfect shot. To install the app, visit **support.logitech.com/product /brio/downloads**
