

ENHANCE COLLABORATION

Logitech Video Collaboration Portfolio

Logitech® has collaborated with Microsoft® to offer a range of brilliantly designed collaboration tools that are certified for Skype® for Business¹. With Logitech and Microsoft, video meetings are both productive and affordable.

Logitech SmartDock was designed and created in collaboration with Microsoft as the first AV Control Console for Skype Room Systems. With SmartDock, IT admins can confidently and

affordably deploy a video conferencing solution in every meeting room and provide meeting organizers with the familiar Skype for Business interface they already know and love.

In addition, Logitech offers a portfolio of Skype-certified products for meeting spaces and desktop collaboration. The Logitech ConferenceCam lineup includes options for everything from huddle rooms to large

conference spaces. Working at your desk? Logitech webcams and headsets are designed for individuals who join meetings remotely, including on the road or in a home office.

By certifying Logitech products for Cortana® and Windows® Hello™, we've also made them more secure and easier to use, enhancing productivity and collaboration with intuitively designed tools that adapt to the way you work. Employees can get to work quickly with products IT trusts.
